Anti-Hairball

Dietary fibres support the transport of swallowed hairs through the digestive track. This way they can prevent the development of hair balls.

Urinary-pH 6,0-6,5

The careful selection of ingredients and the special recipes ensure a perfect calcium-phosphorus ratio and a reduced magnesium level. A pH-value of 6.0-6.5 is being supported and can reduce the risk of urinary stone formation.

Skin & Coat

A shiny, silky coat and healthy skin are indicators for a well nourished cat. This is being reached by fatty acids, vitamins and easily absorbable organically bound zinc and copper.

Complete feed for adult cats
